Seismic Hazards Mapping Program Fees (SMIP)

The California Strong Motion Instrumentation Program (CSMIP) was established in 1972 by the California Legislature to obtain vital earthquake data for the engineering and scientific communities through a State-wide network of strong-motion instruments. Residential construction of three stories and less will use the table entitled Category 1. For all other construction, the table entitled Category 2 will be used. Five percent (5.0%) of SMIP fees collected are retained by the City for seismic education and data utilization.

- 8 Applications may be subject to an hourly fee for applicable staff time in order to be fully cost recovered. This hourly rate only applies to unusually large or complex projects that require staff support beyond the scope of work included in the development of the basic fees and will be based on the time required to process the entire project. The applicant will be notified if this fee is applicable to their project.
- 9 Limited to the materials and supplies used to make copies.
- 10 Projects that require General Plan Amendments, Precise Plan Amendments, and/or zoning text amendments are required to obtain City Council Gatekeeper authorization.
